## Professional Experience

---

### First Performance

Atlanta, GA

#### PRODUCT MANAGER

April 2018 - Present

- Created and implemented Company wide product strategy initiatives alongside senior management team, including CEO, CTO and Head of Product
- Led development of Card on File product from idea to implementation, managing a team of developers and designers while collaborating with marketing and sales teams to effectively sell the product
- Managed strategy and evolution of the Merchant Data Cleansing product umbrella, establishing a platform for the Company to build future products
- Furthered relationships with world's largest credit card brands and issuers, resulting in multiple pilot implementations and commercial roll-outs of Card on File and Merchant Data Cleansing
- Developed Company's Chatbot offering, providing a platform for cardholders to access card controls and additional solutions through their preferred messaging system
- Actively refined product management and development best practices, resulting in increased Company success in product delivery and improved reception among clients

### Kenzie Lane Innovation — Remedy

Atlanta, GA

#### PRODUCT MANAGEMENT INTERN

May 2017 - December 2017

- Selected as Company's first product management intern, collaborating with product team on multiple high-impact projects
- Created Remedy Score, a key metric to help clients identify urgent customer issues to address, decreasing response time by up to 31%
- Developed predictive natural language processing and machine learning models to efficiently analyze client data, resulting in a ~66% reduction in data processing time
- Architected data pipeline, streamlining data gathering, storage, processing and visualization for product team members
- Worked closely with clients, including the Atlanta Braves, to understand needs and gather feedback to enhance Company's product offering

### Anvaya Solutions

Sacramento, CA

#### SECURITY ANALYST INTERN

May 2015 - August 2015

- Conducted system penetration tests; network and infrastructure security assessments to improve clients' security

### Ford Research and Innovation Center

Palo Alto, CA

#### RESEARCH AND DEVELOPMENT INTERN

May 2014 - August 2014

- Developed and patented innovative applications of Ford's OpenXC platform for commercial and research purposes
